#### BLOOM & FRUITS

Delicate pendant flowers, with outer red and inner yellow petals, blooming from May to June.

#### FEATURES

Delicate airy foliage in spring to early summer dies back and goes dormant in late summer heat.

#### USE BY PEOPLE & CULTURAL SIGNIFICANCE

The Haida believe that 'red rain-flowers' should not be picked or it would rain. Different indigenous groups had various medicinal uses for the roots and leaves.

#### WILDLIFE VALUE

Flowers are favoured by butterflies and hummingbirds.

#### CARE INSTRUCTIONS

Hybridizes readily with cultivated varieties so keep well separate if you want to propagate from seed.
